# Stage 4 Assessment Handbook

## Introduction

The purpose of this booklet is to inform students and parents of the topics studied, assessment tasks and report criteria used to give feedback on students' academic progress in each subject.

In the junior years the assessment system is very simple, and quite flexible. However, as students' progress through their school years, assessment procedures become much more rigorous and rigid to ensure the school complies with requirements mandated by the NESA.

Assessment is the process of identifying, gathering and interpreting information about our student's learning. The purpose of assessment is to provide information on student achievement and progress and set the direction for ongoing teaching and learning.

Reporting is the process of communicating information about student achievement and progress.

## Responsibility

*The role of teachers is to use assessment to:*

- Support student learning
- Monitor student learning
- Diagnose student needs
- Provide suitable adjustments to allow all students to access the task.
- Evaluate the effectiveness of our programs
- Inform student/parents about progress, and
- Assist accountability
- Provide feedback to students to enable them to improve.

*What is effective assessment practice?*

- It is clear and directly linked to the outcomes
- It is integral to teaching and learning
- It is balanced, comprehensive and varied
- It is valid, fair and reliable
- It engages the learner
- It values teacher judgment
- It is time efficient and manageable
- It recognises individual achievement and progress
- It involves a whole school approach
- No more than 50% weighting of assessment tasks should be in the form of across the year formal exams
- Assessment and class placement will be based on a cumulative year assessment
- Students are given two weeks' notice of impending tasks.

Murrumburrah High School has outcome based reporting that is completed by staff at the end of each semester. The outcomes are linked to the assessment schedules and are then reported on individually in the reports. The reports are expressed in plain English to enable parents to know how their children are progressing. Reports will be semester based.

*The task of students is to:*

- Attempt all tasks to the best of their ability
- Be aware of the assessment schedule and seek assistance if needed
- Understand assessment requirements and rules
- Submit tasks on due date

*Parents and carers can help by:*

- Understanding assessment processes
- Being aware of assessment booklets and requirements
- Attending parent/teacher information evenings
- Encouraging students to do their best
- Contacting the school when they need assistance.

### **Non-Completion of Course Requirements**

The satisfactory completion of a course shows evidence that the student has;

- a) followed the course developed or endorsed by the NESAs; and
- b) applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- c) achieved some or all of the outcomes.

Where a student is in danger of not meeting the above requirements, they are issued with a warning letter that gives them the opportunity to redeem themselves. It is the responsibility of each class teacher to monitor these requirements.

Warnings are completed on Sentral. These will be under one of the following categories;

- Non-completion of in-class tasks
- Non-attempt at work
- Non-serious effort.

In the event of a student not submitting an assessment task on the due date, they can approach the Head Teacher and complete a Misadventure/Illness form. It is the student's responsibility to collect and have this form completed within twenty-four hours and submitted to the Head Teacher of that subject. The Head Teacher of the faculty makes the final decision based on the evidence in the appeal.
